GENERAL SERVICES ADMINISTRATION
FEDERAL SUPPLY SERVICE
AUTHORIZED FEDERAL SUPPLY SCHEDULE PRICE LIST

Online access to contract ordering information, terms and conditions, up to date pricing, and the option to create an electronic delivery order are available through GSA Advantage!®, a menu driven database system. The internet address for GSA Advantage!® is: GSAAdvantage.gov.

MULTIPLE AWARD SCHEDULE
FSC GROUP: Information Technology

CONTRACT NUMBER:
47QTCA23D008G

Emerge Tek, LLC
6708 Rockledge Place
Centreville, VA 20121
Phone: 703-864-1273
Fax: 703-787-7404
https://www.emerge-tek.com/
Contract Administrator: Sandip Ghosh
contracts@emerge-tek.com

PERIOD COVERED BY CONTRACT:
May 16, 2023 through May 15, 2028

Price List is current through PO-0001, effective May 16, 2023

Business Size:
Small Disadvantaged Business

For more information on ordering go to https://www.gsa.gov/schedules.

Prices Shown Herein are Net (discount deducted)

CUSTOMER INFORMATION

1a. Table of Awarded Special Item Numbers with appropriate cross-reference to page numbers:

SIN	SIN Description
54151S/RC/STLOC	Information Technology Professional Services

1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply. *See below.*

1c. If the Contractor is proposing hourly rates a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate "Not applicable" for this item. *See below.*

2. Maximum Order: *$500,000.00*

3. Minimum Order: *$100.00*

4. Geographic Coverage (delivery Area): *Domestic*

5. Point(s) of production (city, county, and state or foreign country): *Same as Contractor*

6. Discount from list prices or statement of net price: *Government net prices (discounts already deducted).*

7. Quantity discounts: *None*

8. Prompt payment terms: *Net 30 Days.*
   Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.

9. Foreign items (list items by country of origin): *All items are U.S. made end products, designated country end products, Caribbean Basin country end products, Canadian end products, or Mexican end products as defined in the Trade Agreements Act of 1979, as amended.*

10a. Time of Delivery (Contractor insert number of days): *Specified on Task Order*

10b. Expedited Delivery. The Contractor will insert the sentence "Items available for expedited delivery are noted in this price list." under this heading. The Contractor may use a symbol of its choosing to highlight items in its price list that have expedited delivery: *Contact Contractor*

10c. Overnight and 2-day delivery. The Contractor will indicate whether overnight and 2-day delivery is available. Also, the Contractor will indicate that the schedule customer may contact the Contractor for rates for overnight and 2-day delivery: *Contact Contractor*

10d. Urgent Requirements. The Contractor will note in its price list the "Urgent Requirements" clause of its contract and advise agencies that they can also contact the Contractor's representative to affect a faster delivery: *Contact Contractor*

11. F.O.B Points: *Destination*

12a. Ordering Address: *Same as Contractor*

12b. Ordering procedures: *For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA's), are found in Federal Acquisition Regulation (FAR) 8.405-3.*

13. Payment address: *Same as Contractor*

14. Warranty provision: *Contractor's standard commercial warranty.*

15. Export Packing Charges (if applicable): *N/A*

16. Terms and conditions of rental, maintenance, and repair (if applicable): *N/A*

17. Terms and conditions of installation (if applicable): *N/A*

18a. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable): *N/A*

18b. Terms and conditions for any other services (if applicable): *N/A*

19. List of service and distribution points (if applicable): *N/A*

20. List of participating dealers (if applicable): *N/A*

21. Preventive maintenance (if applicable): *N/A*

22a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants): *N/A*

22b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contactor's website or other location.) The EIT standards can be found at: www.Section508.gov/.

23. Unique Entity Identifier (UEI) number: *EU5PRBMMDWH1*

24. Notification regarding registration in System of Award (SAM) database: *Registered (9AMT4)*

Service Contract Labor Standards (SCLS)

The Service Contract Labor Standards (SCLS), also referred to as the Service Contract Act (SCA) is applicable to this contract as it applies to the entire Multiple Award Schedule and all services provided. While no specific labor categories/services have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CFR 541.300), this contract still maintains the provisions and protections for SCA eligible labor categories. If and / or when the contractor adds SCA labor categories / employees to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCA matrix identifying the GSA labor category titles, the occupational code, SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.

LABOR CATEGORY DESCRIPTIONS

Applications Programmer - Level I
Devises or modifies procedures to solve problems considering computer equipment capacity and limitations, operating time, and form of desired results. Designs, codes, tests, debugs, and documents.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 5 years

Applications Programmer - Level II
Assist with the analysis of information requirements. Aid in the evaluation of problems with workflow, organization, and planning and help in the development of appropriate corrective action.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 7 years

Applications Programmer - Level III
Participate in the design of software tools and subsystems to support reuse and domain analysis. Assist Applications Engineer and Applications Programmer to interpret software requirements and design specifications to code, and integrate and test software components.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 10 years

Business Analyst - Level I
Provide analysis and design of business systems for different applications such as: financial, accounting, human resources, and other enterprise systems. Handle test scripts and service requirements; work closely with end users on project development and implementation. Analysts should have a working knowledge of relational database environments, structured analysis, data modeling, information engineering, mathematical model building, sampling, and cost accounting to plan the system.   Prepare cost-benefit and return-on-investment analyses to help management decide whether implementing the proposed system will be financially feasible.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 5 years

Business Analyst - Level III
Analysts should have a working knowledge of relational database environments, structured analysis, data modeling, information engineering, mathematical model building, sampling, and cost accounting to plan the system. Specify the inputs to be accessed by the system, design the processing steps, and format the output to meet the users' needs. Prepare cost-benefit and return-on-investment analyses to help management decide whether implementing the proposed system will be financially feasible. Possess excellent verbal and written communications skills
Minimum Education: Bachelor's degree
Minimum Years of Experience: 10 years

Project Manager - Level I
     Typically oversee all aspects of the project, leading a team on small projects or a segment of large and complex projects. Analyze new and complex project-related problems and create innovative solutions that normally involve the schedule, technology, methodology, tools, solution components, and financial management of the project. Provide applications systems analysis and long and short-range plans for application selection, systems development, systems maintenance, and production activities for necessary support resources. Commensurate experience and education for the specific level.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 6 years

Project Manager - Level II
     Responsible for all aspects of the development and implementation of assigned projects and provides a single point of contact for those projects. Takes projects from original concept through final implementation. Interfaces with all areas affected by the project including end users, computer services, and client services. Defines project scope and objectives. Develops detailed work plans, schedules, project estimates, resource plans, and status reports. Conducts project meetings and is responsible for project tracking and analysis. Ensures adherence to quality standards and reviews project deliverables. Provides technical and analytical guidance to project team. Recommends and takes action to direct the analysis and solutions of problems.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 12 years

Project Manager Level III
     Typically oversee all aspects of the project, leading a team on large projects or a significant segment of large and complex projects. Analyze new and complex project-related problems and create innovative solutions that normally involve the schedule, technology, methodology, tools, solution components, and financial management of the project. Provide applications systems analysis and long and short-range plans for application selection, systems development, systems maintenance, and production activities for necessary support resources. Commensurate experience and education for the specific level.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 14 years

Quality Assurance Analyst - Level I
     Provide technical and administrative direction for personnel performing software development tasks, including the review of work products for correctness, adherence to the design concept and to user standards, review of program documentation to assure Government standards/requirements are adhered to, and for progress in accordance with schedules. Coordinate with the Project Manager and/or Quality Assurance Manager to ensure that problems are solved to the user's satisfaction. Make recommendations, if needed, for approval of major systems installations.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 5 years

Quality Assurance Specialist - Level II

Develop and implement quality control methodologies to ensure compliance with quality assurance standards, guidelines, and procedures in a large computer-based organization. Develop and define major and minor characteristics of quality including quality metrics and scoring parameters and determines requisite quality control resources for an actual task order. Establish and maintain a process for evaluating hardware, software, and associated documentation and/or assist in the evaluation. Conduct and/or participate in formal and informal reviews at pre-determined points throughout the development life cycle.

Minimum Education: Bachelor's degree
Minimum Years of Experience: 7 years

Quality Assurance Analyst -Level III

Carries out procedures to ensure that all information systems, products and services meet organization standards and end-user requirements. Performs and leads tests of software to ensure proper operation and freedom from defects. May create test data for applications. Documents and works to resolve all complex problems. Reports progress on problem resolution to management. Devises improvements to current procedures and develops models of possible future configurations. Acts as information resource about assigned areas to technical writers and other Quality Assurance Analysts. Performs complex workflow analysis and recommends quality improvements.

Minimum Education: Bachelor's degree
Minimum Years of Experience: 10 years

Systems Administrator - Level II

Perform the daily activities of configuration and operation of systems which may be mainframe, mini, or client/server based. Perform the optimizing of system operation and resource utilization, and perform system capacity analysis and planning. Provide assistance to users in accessing and using business systems. Commensurate experience and education.

Minimum Education: Bachelor's degree
Minimum Years of Experience: 5 years

Systems Administrator - Level III

Responsible for activities related to system administration. Assigns personnel to various projects, directs their activities, and evaluates their work. In addition to all SA-Intermediate level duties, ensures long-term requirements of systems operations and administration are included in the overall information systems planning of the organization. Responsible for the installation, maintenance, configuration, and integrity of computer software. Implements operating system enhancements that will improve the reliability and performance of the system.

Minimum Education: Bachelor's degree
Minimum Years of Experience: 10 years

Test Engineer
Subject matter specialist providing testing know-how for the support of user requirements of complex to highly complex software/hardware applications. Directs and/or participates in all phases of risk management assessments and software/hardware development with emphasis on analysis of user requirements, test design and test tools selection.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 5 years

Web Software Developer
Designs, develops, troubleshoots, debugs, and implements software code (such as HTML, CGI, and JavaScript) for a component of the website. Works with graphic designers and other members of a project team to develop the site concept, interface design, and architecture of the website. Responsible for interface implementation. Integrates web applications with backend databases. Deploys large web-based transaction systems using application servers. Researches, tests, builds, and coordinates the integration of new products per production and client requirements. Requires strong navigation and site-design instincts.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 5 years

Application Engineer Sr.
Aids in the design and development of IT systems and redesign of existing systems to fulfill the needs of customers. Design, develop and implement new Information Technology applications. Perform software and application enhancements in conjunction with functional users and system alternative solutions. Review and analyze program specifications to meet design changes required in the development of the systems.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 10 years

IT Process Consultant
Research and analyze basic and complex IT issues surrounding the technology processes and systems of an organization. Makes recommendations surrounding improving IT processes, efficiency and technology practices. Ensure enterprise- wide integration of IT upgrade efforts between multiple projects. Provide effective IT training and information technology knowledge transfer to group members. Activities include data modeling, assessing IT performance measurements and managing customer technology/user expectations.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 10 years

Functional Analyst Senior

Define business requirements to successful completion ▪ Discovery, analysis, reporting and documentation. Drive the development of the functional requirements and data model to support the user's reporting requirements. Facilitate meetings with the government client to prioritize and validate stated requirements. Utilize Rational tools i.e. Clear Quest, Requisite Pro and Rational Quality Manager. Coordinate with the technical architect, developers and client subject matter experts to ensure requirements are understood. Perform testing and develop use/test cases. Assist the Work Order Project Manager.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 5 years

IT Program Manager

Ensures technology and infrastructure conformity to all IT contractual obligations and is responsible for the overall IT contract performance. Responsibilities include organization, direction, coordination, and planning of all technology and infrastructure support activities during performance of IT project Serves as the single point of contact and is the authorized interface with the Government Contracting Officer, COTR, management personnel and customer agency representatives. Formulates and reviews strategic technology plans to adhere to IT obectives and technology deliverable items, determines IT contract costs, and ensures conformance with applicable IT standards. Assigns IT schedules and reviews work of team members. Applies quality assurance measures to the management and performance of the IT contract. Monitors financial status of the program and resolves programmatic and financial issues under IT project performance.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 10 years

Senior Technical Consultant

Provide comprehensive consulting and development services to enterprise clients for a wide range of drupal-based technology projects. Serve as the dedicated, technical experts for Communications and Strategy programs providing strategic planning and communication outreach services. Developing and updating strategy and documenting and maintaining the customer's strategic plan. Creating cost-effective methods for engaging end-users and sponsors. Documenting methods. Providing effective messages to increase user acceptance and ease transitions for new tools and services. Developing clear sponsorship activities, roles, and guidelines. Implementing outreach and communications plans for customers and workforce.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 10 years

Information Technology Consultant I

Applies, as appropriate, activity and data modeling, transaction flow analysis, internal control and risk analysis and modern business methods and performance measurement techniques. Applies business process improvement practices to re-engineer methodologies/principles and business process modernization projects. Assists in establishing standards for information systems procedures. Develops and applies organization-wide information models for use in designing and building integrated, shared software and database management systems. Constructs sound, logical business improvement opportunities consistent with corporate information management guiding principles, cost savings, and open system architecture objectives. Provides daily supervision and direction to staff.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 7 years

Programmer III

Designs and codes COTS software components, units, and modules that meet product specification and development schedules. Tests and debugs assigned components and units. Participates in large systems and subsystem planning. Adheres to product build and release schedules and strategies. Acts as a technical resource for lower-level developers.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 7 years

Solution Architect

Serve as primary technical contact with the client and gather product requirements from customers. Evaluate, and when necessary prototype, alternatives to determine the most appropriate approach for each solution. Prepare functional specifications that can be understood by customers and internal development teams. Transition finished projects to the support group. Represent the platform in discussions with client's engineering, marketing, business development, and other high-level departments. Will prepare and maintain documents that include architecture diagrams, data models, and navigation maps. Will analyze and prepare recommendations to address existing and potential trouble areas in systems and procedures as well as design and recommendation on new solutions both in relation to hardware and software design.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 7 years

System Developer

Designs architecture to include SW, HW and communications to support total requirements as well as provide for present and future cross-functional requirements and interfaces. Develop, design, analyze, modify, implement, document, enhance and maintain enterprise Data Center systems. Serves as the technical lead on all Systems related topics. Resolve production issues minimizing system down time and ensure that the systems are operational. Pro-actively identify and correct systems issues, performance, storage, backup and recovery. Upgrade hardware and software as needed. Mentor systems team on best practices and provide technical guidance. Recommend enhancements for corporate systems design and components. Develop systems reports on the health and status of the systems. Document the systems and updates documentation whenever changes are performed.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 6 years

System Engineer SME

Formulates/defines specifications, develops/modifies/maintains complex systems and subsystems, using vendor engineering releases and utilities for overall operational systems. Applies analytical techniques when defining work problems, designing technology solutions, and developing procedures to resolve the problems. Develops complete specifications to enable programmers to prepare required programs. Reviews task proposal requirements, gathers information, analyzes data, prepares project synopses, compares alternatives, prepares specifications, and resolves processing problems. Coordinates work with programmers and engineers, and orients users to new systems. Prepares recommendations for system improvement for management and user consideration.
Minimum Education: Bachelor's degree
Minimum Years of Experience: 5 years

Acceptable Education and Experience Equivalencies:

A high school diplomace and 5 years of experience or an associates degree and 2 years of experience may be substituted for a Bachelor's degree.
